

Read like a SPORTS SCIENTIST

Look for key terms and concepts.

Do you know what all the key terms and concepts mean? How can you improve your understanding?

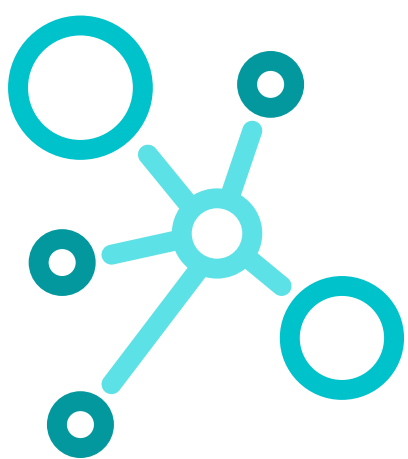

Look for biographical information about sportspeople.

When and where were they born? How did their career develop? What were their key achievements? How did they stay motivated?

Interpret data, illustrations and charts carefully.

What is the data showing? What can you infer from the data? Is it what you would expect based on your existing knowledge?

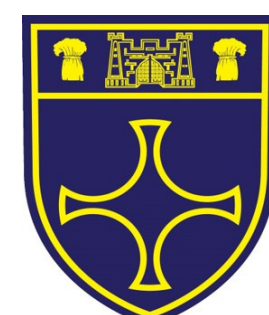

Make links with other things you know.

How can you link this information to things you have learnt in other subjects, such as science?

'If my mind can conceive it, and my heart can believe it - then you can achieve it.'

- Muhammad Ali
